

Francisco Londoño Rodríguez

SOFTWARE AND MULTIMEDIA ENGINEER

About me

Software and multimedia engineer with 6 years of experience in software development. Skilled in the design and implementation of interactive interfaces and technology management for mobile application development. Experienced in building applications using React Native, creating user interfaces with a focus on user experience, and publishing apps to the App Store and Play Store.

Work Experience

Developer React Native

Wolf.xyz **January 2021 - July 2026**

I led the development and maintenance of mobile applications for multiple clients, optimizing operational processes and technical scalability.

Multimedia Engineer in the project “Local Logistics Management System in Pandemic Risk Scenarios COVID-19- SIGELO”

Universidad del Valle **May 2020 - December 2020**

Design, comprehensive development, and operational validation of the mobile application for the SIGELO logistics system for biosecurity supplies.

Multimedia assistant in the development of the Expin Media Lab project.

Universidad Autónoma de Occidente **August 2018 - August 2019**

Creation of experimental multimedia projects and technical support for the management and deployment of applications in the CONECTA-R project. <https://conectar.uao.edu.co>

Education

Professional Degree in AI Development

BIG school | Universidad Isabel I **2026 - present**

Certified program (ECTS) focusing on the integration of AI for software automation, optimization, and deployment. It includes skills in security and quality using tools like LangChain, GitHub Copilot, and language model APIs.

Software engineering student - full-stack web development

Holberton School **2019 - 2021**

Practical focus on computer science fundamentals and full-stack development. Technologies: C, JavaScript, HTML5, CSS, MySQL, and React.

Engineering Multimedia

Universidad Autónoma de Occidente **2012 - 2018**

Comprehensive training with an emphasis on software development, interactive interface design (UI/UX), and mobile application creation. Combining the technical rigor of engineering with creative sensitivity for user-centered digital products.

Projects

MIO APP

Programming leader in the Metro de Cali Contest for the mobile application of the MIO mass transit system in the city of Cali in the university group, where the mobile application was developed alongside other engineering and graphic communication design students.

https://drive.google.com/file/d/1o0SxIxZcC6_GRUtG4IVTZo6mlEg-38qo/view?usp=sharing

OTCI APP

Creation of the mobile application for the technological observatory of the smart city of Cali, managing to reinforce knowledge in the development of mobile applications, interface design and UX design.

CONECTA-R

Program Assistant led by the Faculty of Engineering of the Universidad Autónoma de Occidente, to create new spaces for relationships and projection with families and schools in the regional community, to contribute to the fluid and responsible appropriation of technology in children, teachers and parents, through activities oriented to the STEAM approach (Science, Technology, Engineering, Art, Mathematics).

<https://conectar.uao.edu.co/>

MUSIC-ABLE

Mobile application to help DJs know what music the public wants to listen to in clubs, through a selection by Spotify.

Skills

- Programming languages
 - JavaScript • TypeScript • Dart • HTML5 • CSS3 • SQL
- Frameworks & Libraries
 - React Native • React.js • Flutter • Redux / Redux Toolkit • NativeWind / Tailwind CSS • Axios
- Mobile
 - iOS • Android • CocoaPods • Push Notifications (OneSignal) • App Store & Play Store Publishing • Multi-tenant Architecture
- Testing & Quality
 - Jest • React Testing Library • ESLint • Prettier
- DevOps & CI/CD
 - GitHub Actions • Fastlane • Git / Git Flow
- Backend & Cloud Services
 - Firebase (Firestore • Authentication • Storage) • MySQL
- Monitoring
 - Sentry • Honeybadger
- Tools & Others
 - Adobe Creative Suite • UI/UX Design • Claude (AI-assisted development)
